# Windows UWP Conceptual Documentation:
# Quick Start Guide for Internal Contributors

## Step 1: Open command prompt and clone the Windows-UWP repo

```
git clone https://cpubwin.visualstudio.com/_git/windows-uwp
```

## Step 2:For changes that you want public right away, branch off of master

```
git checkout master
```

```
git pull origin master
```

```
git checkout -b <yourbranchname>
```

```
git push -u origin <yourbranchname>
```

## Step 3: Iteratively make your changes in your branch

<Make changes on your local machine with the text editor of your choice>

```
git add -A
```

```
git commit -m "Fixed a few typos"
```

```
git push origin <yourbranchname>
```

<You will be sent an email from *Open Publishing Build Mail* informing whether your contribution built successfully, in addition to any error warnings such as broken links, click the links to see your content staged on the site>

## Step 4: Merge master back into your branch, resolve any merge conflicts, then submit a pull request

```
git checkout master
```

```
git pull origin master
```

```
git checkout <yourbranchname>
```

`git merge master`   <resolve any merge conflicts>

`git push origin <yourbranchname>`   <Wait for the build mail and verify that your branch was built successfully>

Go to https://cpubwin.visualstudio.com/_git/windows-uwp in your web browser

Click Pull Requests > New pull request

Make sure the merge is set as "Merge changes in <yourbranchname> relative to Master"

If you have been working with a writer, add the writer to the list of Reviewers.

*You might consider emailing the list of reviewers to make sure that your PR is on their radar for review.*

**Thank you for contributing!**
